Steel Log Siding

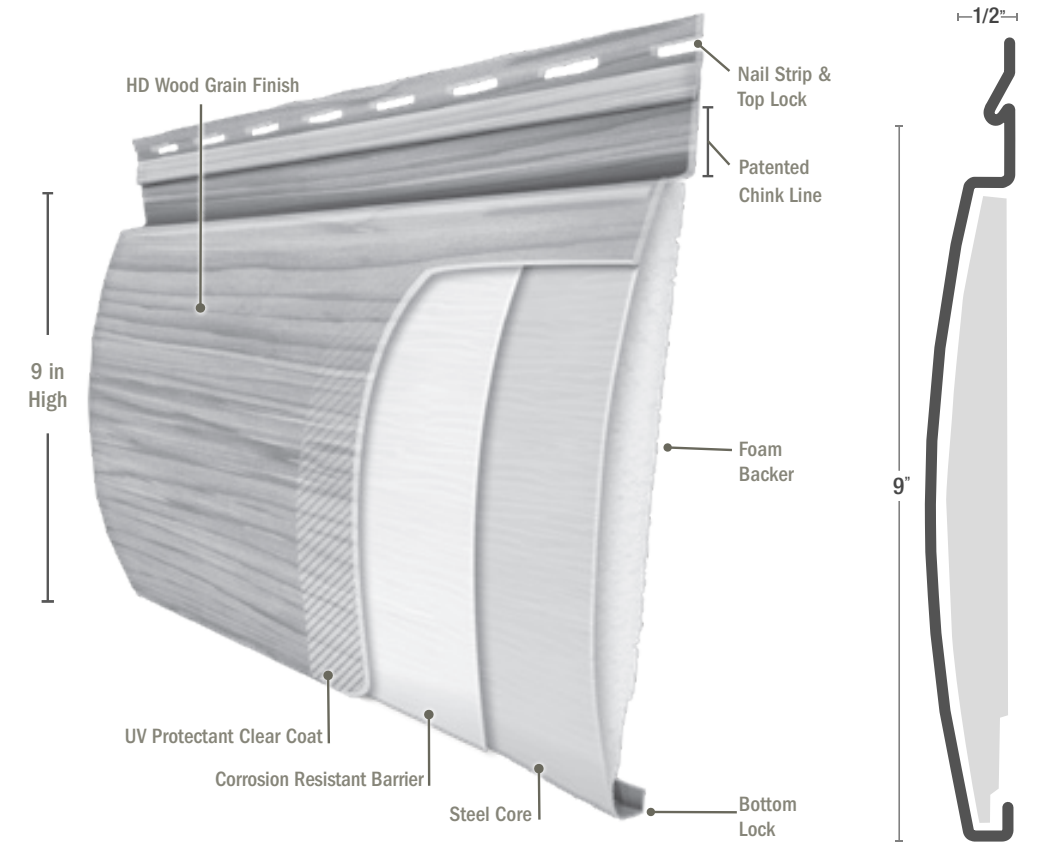

WESTERN CEDAR

MATTE BLACK

St. Germain,
WI

- Panels come in **12 foot lengths** and cover **9 inches high** on the wall
- Foam backer providing an R-Value of 4, making the siding **energy efficient**

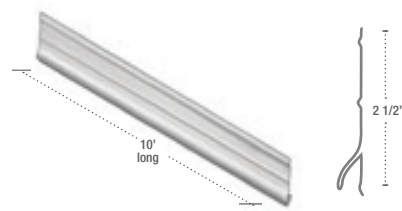

Surrounded by nature, this lakeside retreat showcases Trulog's Western Cedar Steel Siding – the timeless beauty of wood, built to last a lifetime.

Log Ordering & Installation

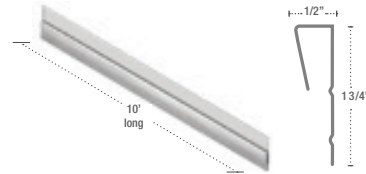

1 Starter Strip – 10' stick

Used to start your siding at the lowest elevation to hook into.

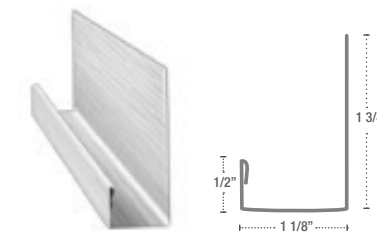

5 Sill Trim – 10' stick

Used to hold your faux log siding in place underneath windows, because there will be a jagged edge due to the cut made to fit under the window.

9 J-Channel – 10' stick

Used to accept the siding after you cut a panel down. Doors & Windows, Elevation Changes, Roofline, Inside corners, etc.

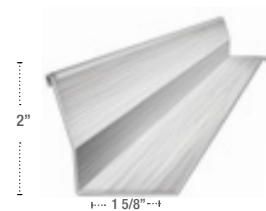

Custom Trim – 10' stick

We can fabricate just about any custom trim piece you need if you provide dimensions and a drawing.

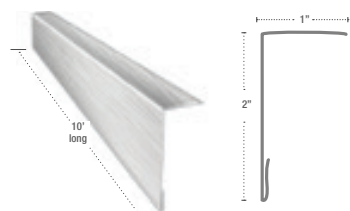

2 Rock Transition – 10' stick

Used to separate and transition for a stone or rock wainscoting to our steel siding.

6 Crown Frieze – 10' stick

One of the last siding accessories to install on your log home – Frieze board is used where the top metal siding panel meets your soffit.

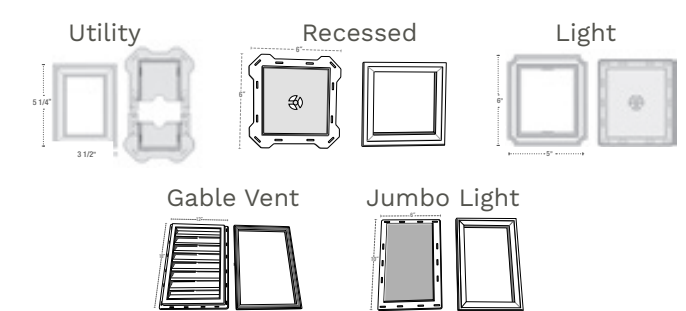

Flat Coil Stock / linear ft

Used to make custom trim on site. Comes in 24" & 11-7/8"

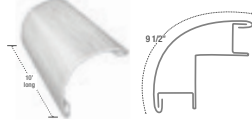

J-Blocks

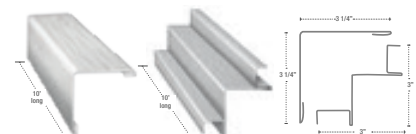

3 Corner Base & Cap – 10' to 13' stick

Used to cover up the corners of your house and hide the cut.

Round Cap

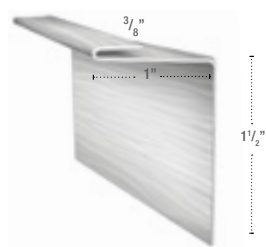

Square Cap

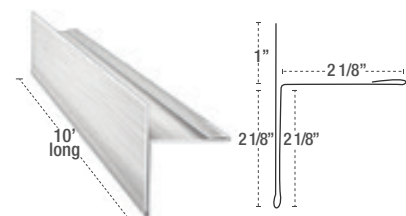

7 Crown Keeper – 10' stick

Used when you don't have a metal or vinyl soffit to snap our crown into. The keeper acts as the attachment point for the crown so you can snap it into the soffit to terminate the siding.

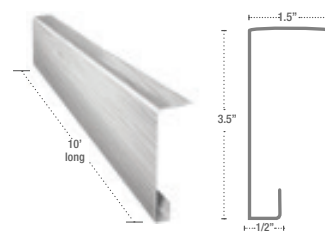

4 Inside Corner Cap - 10' to 13' stick

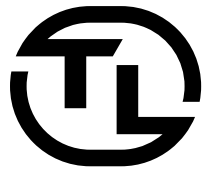

This piece will slide in between your two sticks of J-Channel for that bold, finished look on your inside corners.

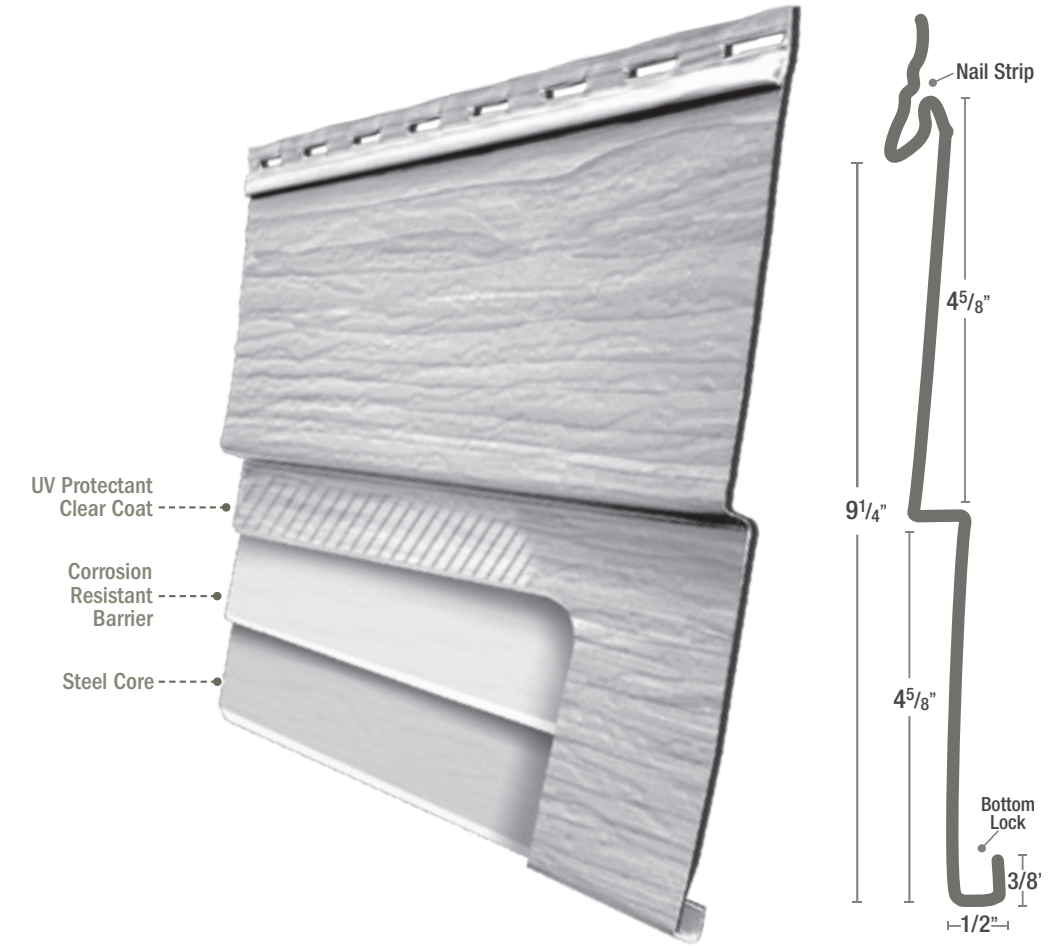

8 Bold Window & Door Trim – 10' stick

Used a great finishing piece for your home – it provides your windows and doors with a bold, trimmed out look like you would see with a 1x4 or 2x4.

Steel Lap Siding

• Panels come in **12 foot lengths** and cover **9.25 inches high** on the wall

Oklahoma

A breathtaking custom home featuring TruLog's Dark Walnut steel Lap siding paired with natural stone accents for a rich, rustic exterior built to last.

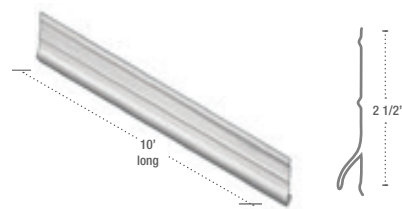

Lap Ordering & Installation

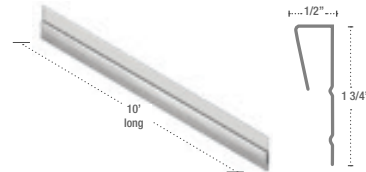

1 Starter Strip – 10' stick

Used to start your siding at the lowest elevation to hook into.

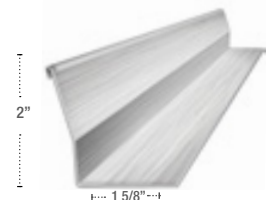

5 Sill Trim – 10' stick

Used to hold your faux log siding in place underneath windows, because there will be a jagged edge due to the cut made to fit under the window.

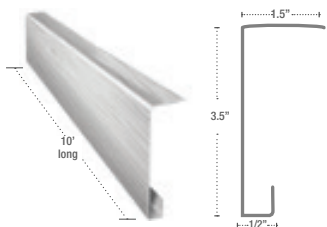

2 Rock Transition – 10' stick

Used to separate and transition for a stone or rock wainscoting to our steel siding.

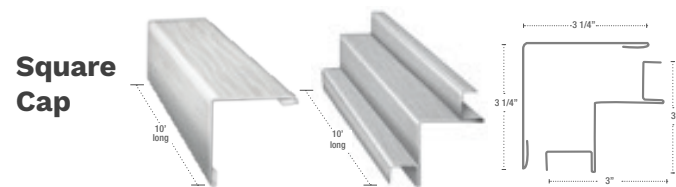

6 Bold Window & Door Trim – 10' stick

Used a great finishing piece for your home – it provides your windows and doors with a bold, trimmed out look like you would see with a 1x4 or 2x4.

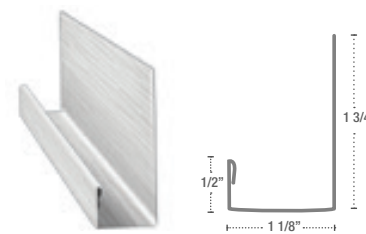

3 Corner Base & Cap – 10' to 13' stick

Used to cover up the corners of your house and hide the cut.

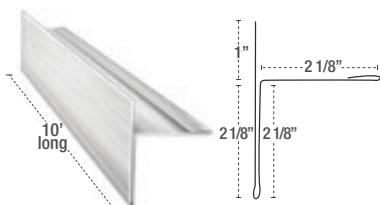

7 J-Channel – 10' stick

Used to accept the siding after you cut a panel down. Doors & Windows, Elevation Changes, Roofline, Inside Corners, Termination into Soffit, etc.

4 Inside Corner Cap - 10' to 13' stick

This piece will slide in between your two sticks of J-Channel for that bold, finished look on your inside corners.

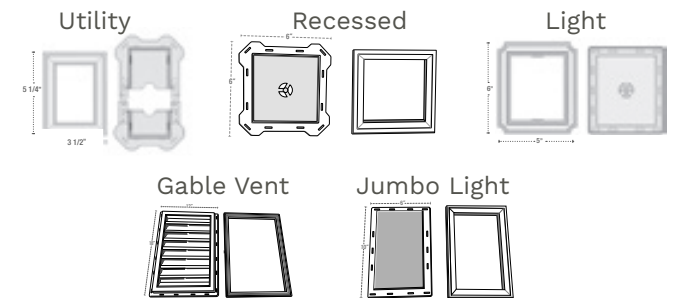

Flat Coil Stock / linear ft

Used to make custom trim on site. Comes in 24" & 11-7/8"

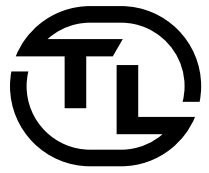

J-Blocks

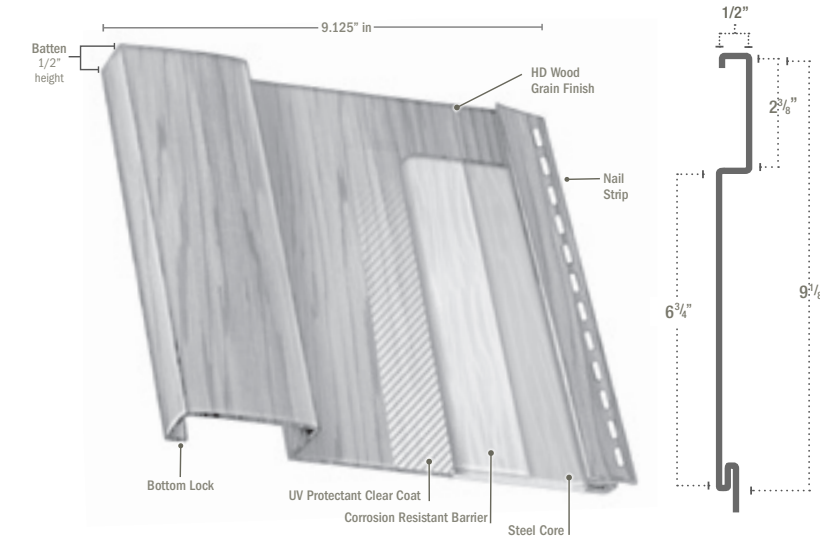

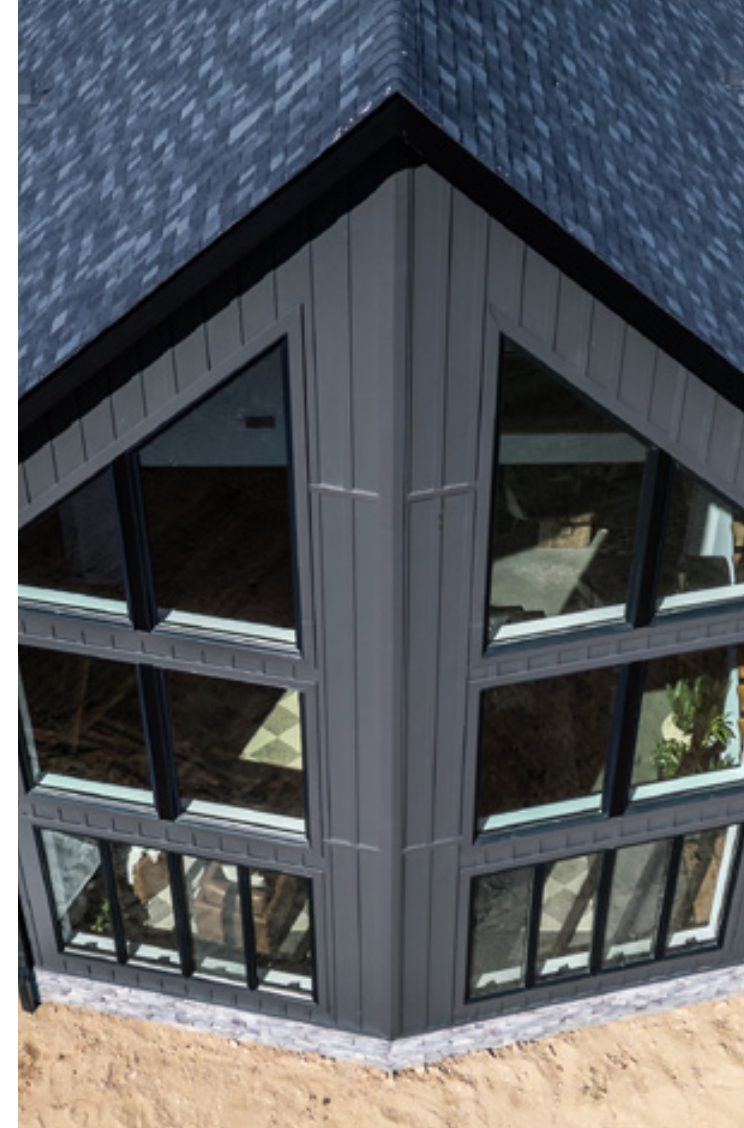

Custom Trim – 10' stick

We can fabricate just about any custom trim piece you need if you provide dimensions and a drawing.

Steel Board & Batten Siding

- Panels come in **8, 9, 10** and up to **16 ft** panels with **custom** lengths available and cover **9.125" inches wide** on the wall

Middleton, NY

This striking New York home features TruLog's Board & Batten siding in Dark Charcoal, delivering bold contrast and modern farmhouse appeal. The deep, rich tone enhances the home's clean lines while the steel construction provides long-lasting durability, weather resistance, and maintenance-free performance – perfect for year-round Northeast conditions.

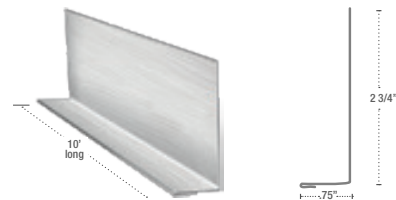

Board & Batten Ordering & Installation

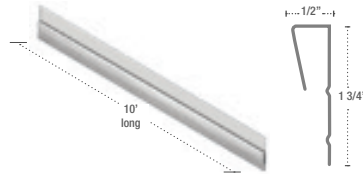

Rat Stop/Starter – 10' stick 1

Used for the starting point – installed at the bottom of the wall and prevents any rodents from getting behind your siding. Can also be used for any level starting point.

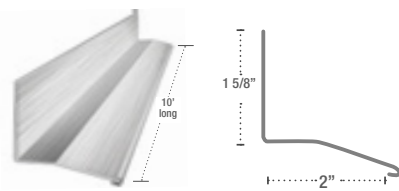

Sill Trim – 10' stick 5

Used to hold your faux log siding in place underneath windows, because there will be a jagged edge due to the cut made to fit under the window.

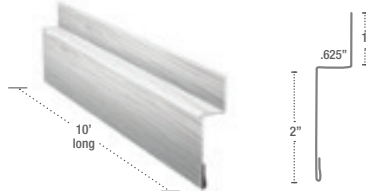

Rat/Rock Combo – 10' stick 2

Used to separate and transition for a stone or rock wainscoting to our steel siding.

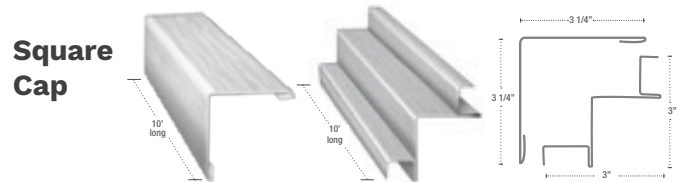

Bold Band Board – 10' stick 6

Used to transition one section of the board and batten on top of another. If you have a wall taller than your main level panels, the band board is used to cap the lower section and also act as the starting point for the next section above it.

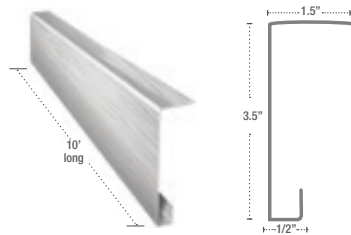

Corner Base & Cap – 10' to 13' stick 3

Used to cover up the corners of your house and hide the cut.

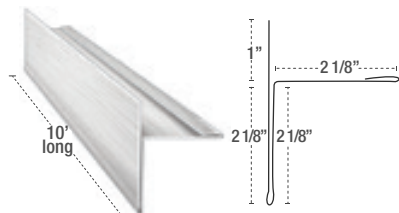

Bold Window & Door Trim – 10' stick 7

Used as a great finishing piece for your home – it provides your windows and doors with a bold, trimmed out look like you would see with a 1x4 or 2x4.

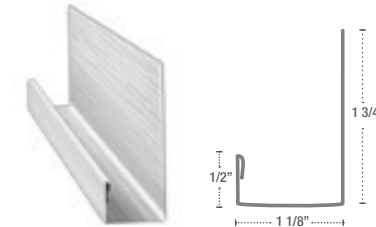

Inside Corner Cap - 10' to 13' stick 4

This piece will slide in between your two sticks of J-Channel for that bold, finished look on your inside corners.

J-Channel – 10' stick 8

Used to accept the siding after you cut a panel down. Doors & Windows, Elevation Changes, Roofline, Inside Corners, Termination into Soffit, etc.

Custom Trim – 10' stick

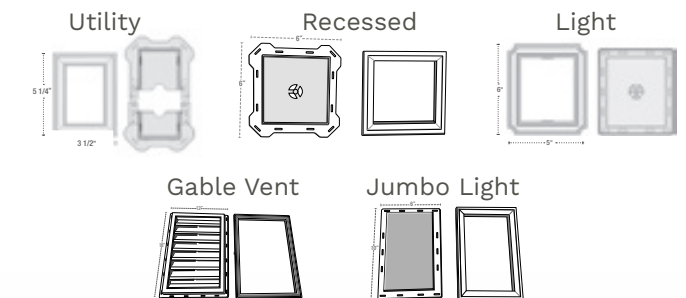

We can fabricate just about any custom trim piece you need if you provide dimensions and a drawing.

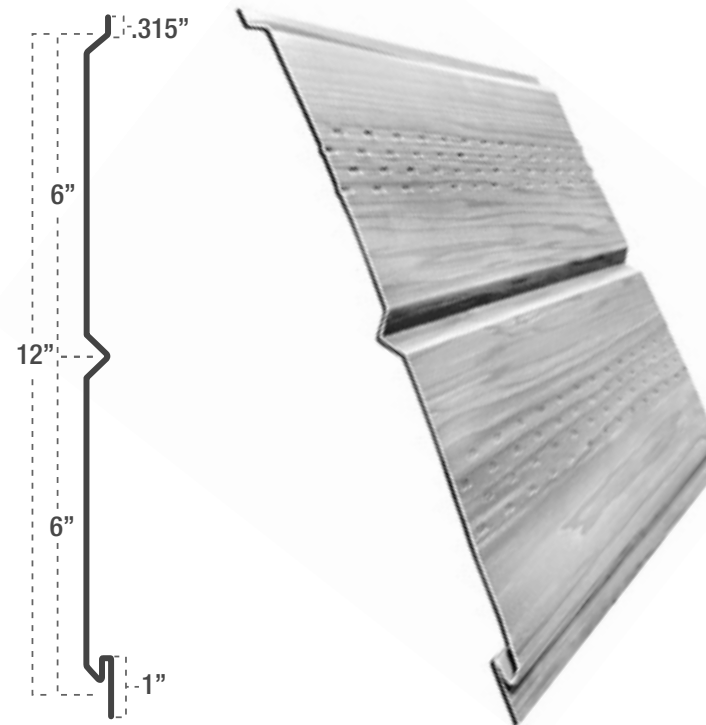

Flat Coil Stock / linear ft

Used to make custom trim on site. Comes in 24\"

J-Blocks

- Panels come in **12 foot lengths** and cover **12 wide**
- Panels can be Vented or non-Vented

How TruLog can help put a full material list together

New Build?

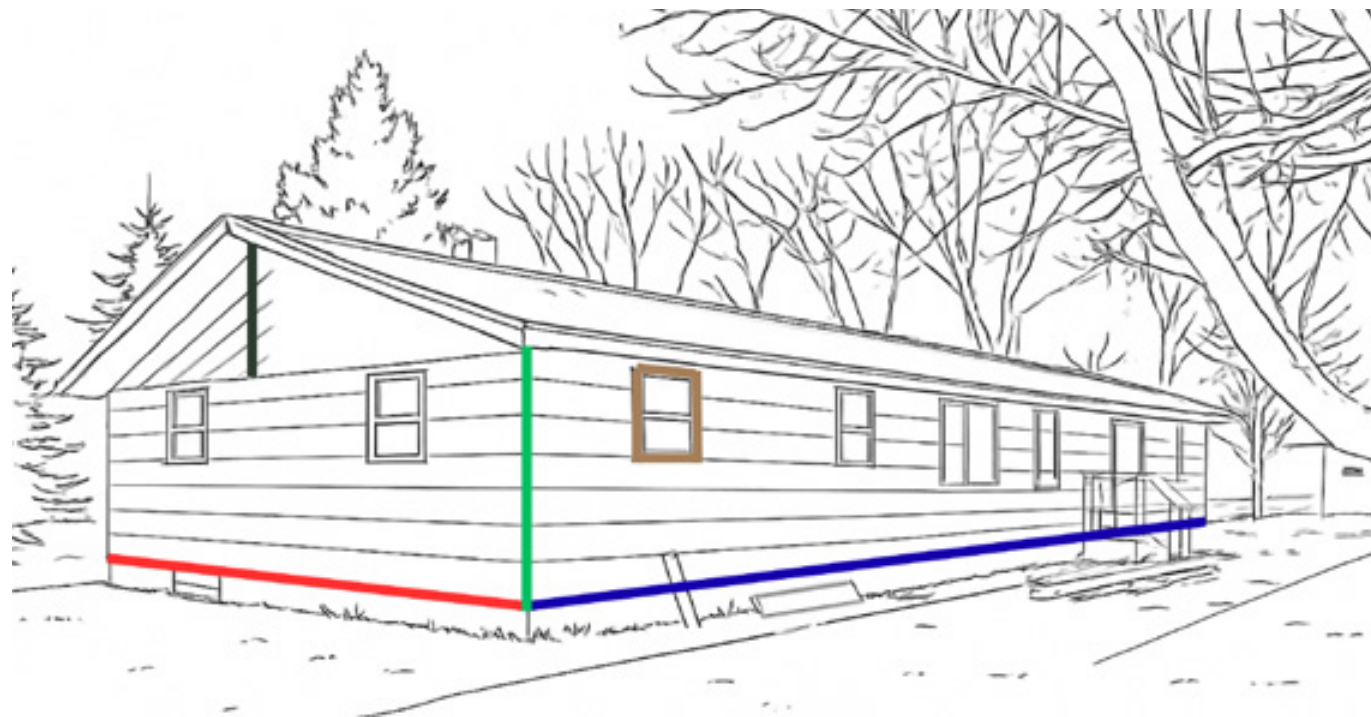

- Send in PDF file of your Blueprints/Plans

Working on a Remodel?

If you are handy with a tape measure, send us the following information:

- ✓ Length, Width & Outside Wall Height
- ✓ Door & Window Measurements
- ✓ Roof Pitch or Gable Height
- ✓ Photos of all sides of the project

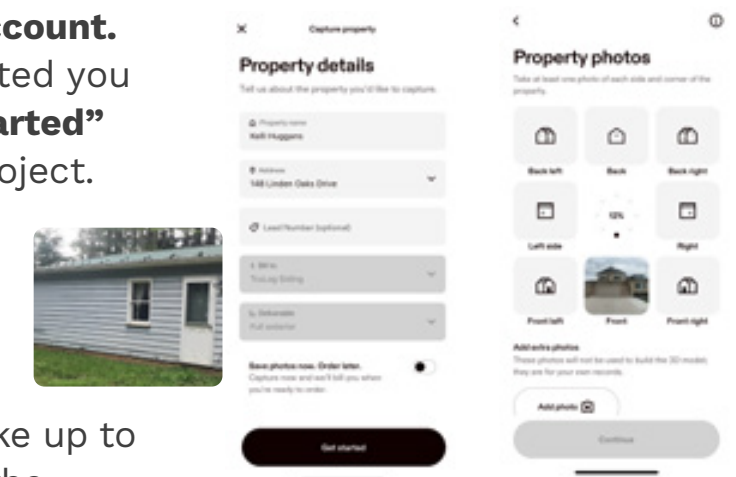

Working on a Remodel?

Not so handy with a tape measure? TruLog has teamed up with HOVER which makes measuring your home as simple as taking 8 photos.

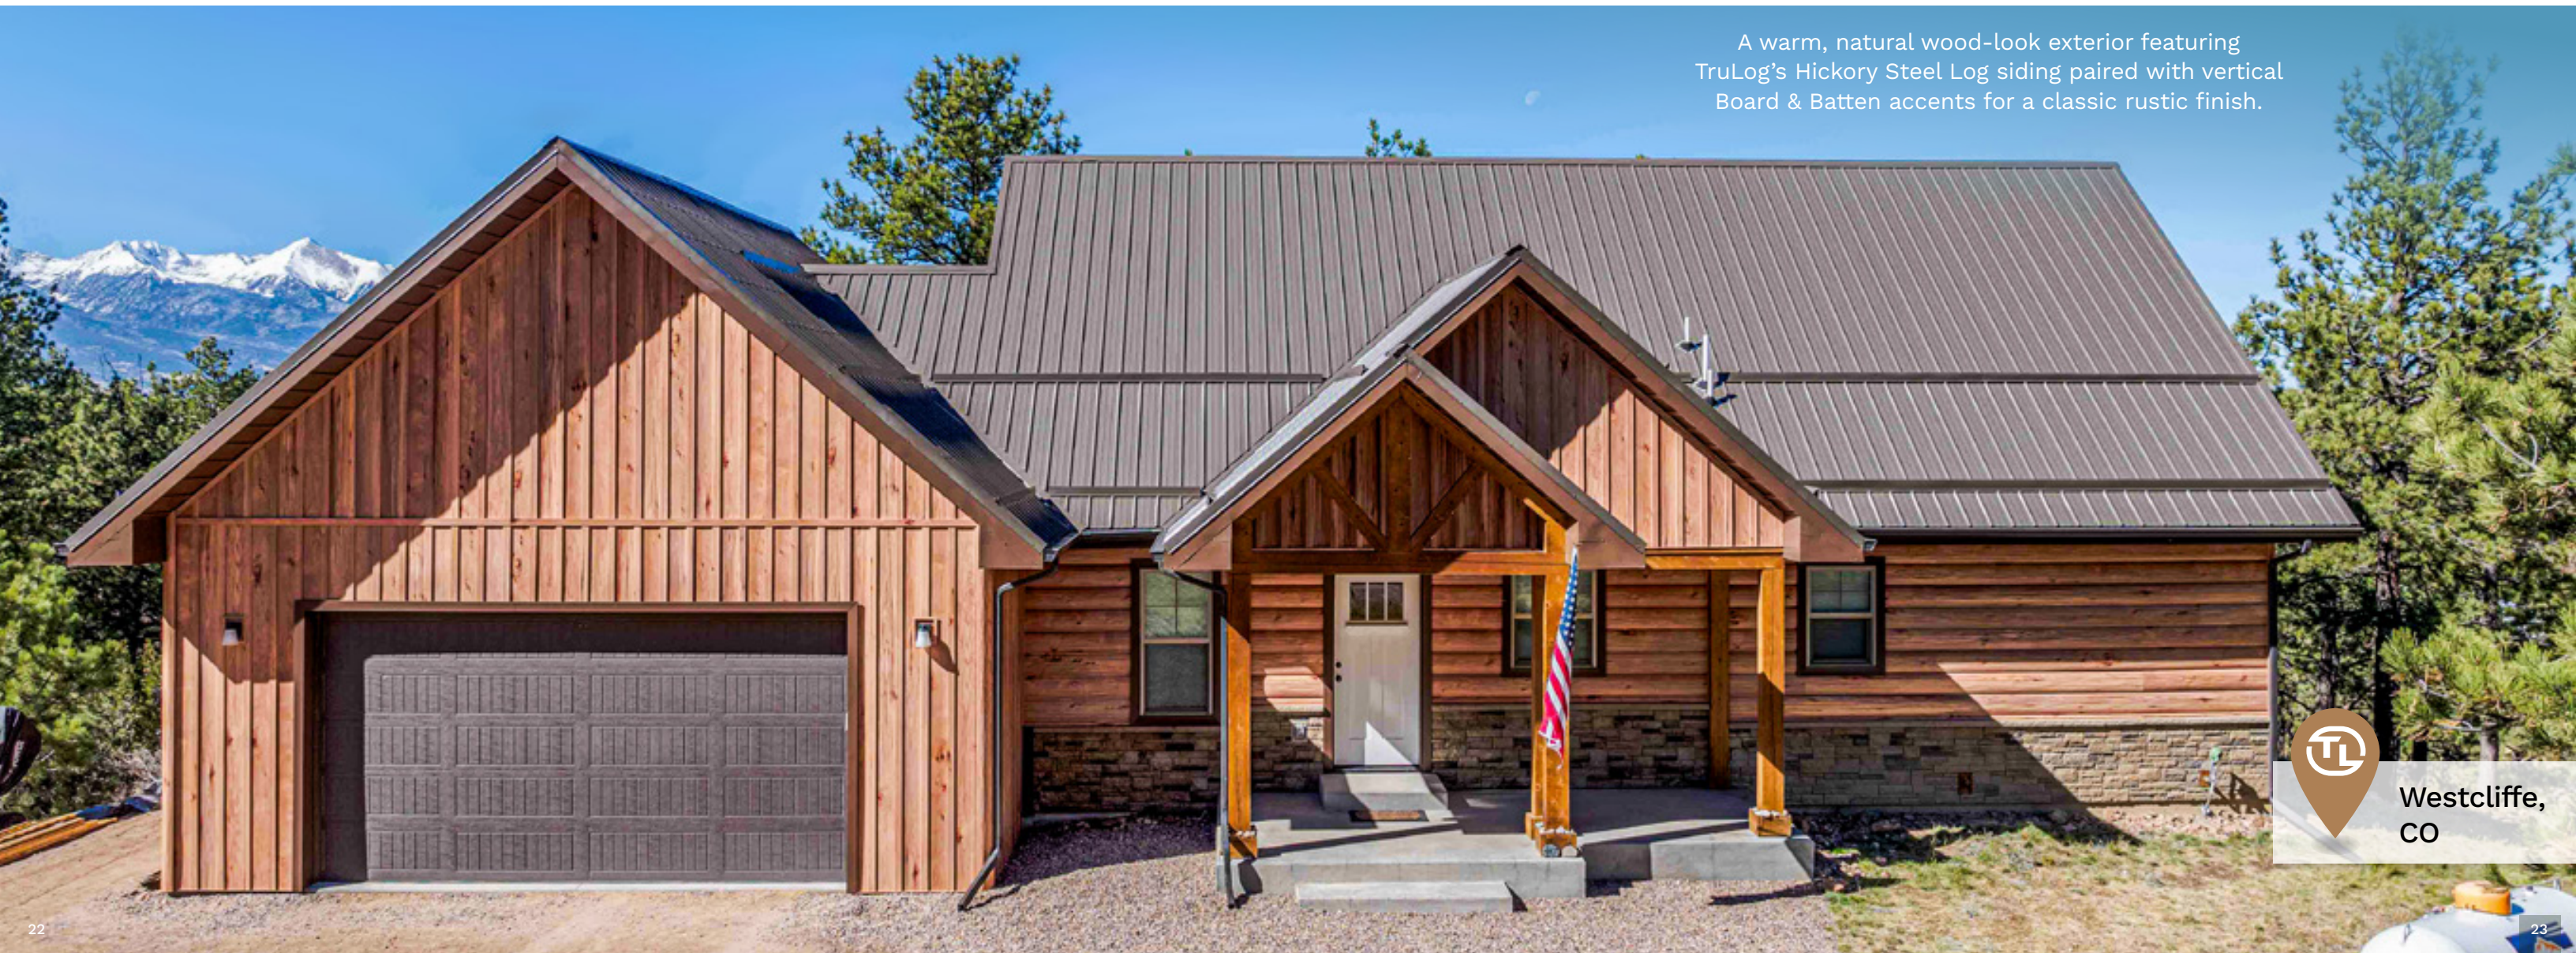

How to do a HOVER

1. **Contact a TruLog Rep** and Provide the following Information:
 - First & Last Name
 - Email Address
 - Phone Number
 - Address of Project
2. The TruLog Rep will send you an invite that guides you to **download the Hover App.**
3. Once you download the app, it will guide you to **create an account.** Once the account is created you will be guided to **“Get Started”** to take photos of your project.
4. You will take **8 photos** (guided by the app) to upload and submit.
5. Once submitted, it will take up to **24 hours** to send TruLog the report showing the measurements for your home.

A warm, natural wood-look exterior featuring TruLog's Hickory Steel Log siding paired with vertical Board & Batten accents for a classic rustic finish.

Westcliffe,
CO

Recommended Installation Tools & Materials:

Cutting Tools

- **Slide Miter Saw with Ferrous Metal Cutting Blade**
 - Exmpl: Diablo, Tenryu, Irwin
 - Visit our website for best current up to date brands

• Steel Snips or Hand Snips

We recommend Midwest Left & Right Offset Aviation Snips

- Hand Snips:

midwestsnips.com/product/left-right-offset-aviation-2-piece-set-mwt-6510c/

• Nibblers or electric shears for your drill or stand alone tool

- Nibblers:

www.dewalt.com/products/power-tools/polishers-shears-and-nibblers

Snap Lock Punch/Notching Tool

You will need a notching tool if you order our crown/frieze board termination trim. This tool is used to punch a notch in the leg of the crown so you can snap it into a soffit j-channel that is either metal or vinyl material.

We recommend a **Malco SL-1 Snap Lock Punch**:

www.malcoproducts.com/category/sheet-metal-notchers-punches/snap-lock-punch-sheet-metal/

Fasteners

You can use a galvanized or anodized screw. A screw with coarse threads from 1-1.5 inches in length

- We recommend **Grabber Fasteners** from Home Depot, **Bugle Head Philips Gold Screw** or something similar in profile & length.

www.homedepot.com/p/Grabber-6-x-1-5-8-in-Bugle-Head-Philips-Gold-Screw-5-lb-per-Box-23265/203111656

- For nails, any **carpenter nail** works fine

Other Helpful Tools

- Cordless Drill
- Caulk Gun
- Blue Chalk Line
- Flat bar
- Utility knife
- Speed square
- Flat nose pliers
- Dap Stain Pens
